

Indiana State Regulated Requirements for Childcare First Aid Kits

Indiana:

In Indiana, childcare centers must adhere to specific regulations regarding first aid kits to ensure the safety and well-being of children. Here are some key requirements:

1. **Contents of First Aid Kits:** First aid kits must be well-stocked and include items such as adhesive bandages, sterile gauze pads, adhesive tape, scissors, tweezers, a digital thermometer, disposable gloves, and a first aid manual.
2. **Accessibility:** First aid kits must be easily accessible to staff but kept out of reach of children. They should be located in areas where they are most likely to be needed, such as classrooms, playgrounds, and kitchens.
3. **Maintenance:** The contents of the first aid kits must be regularly checked and replenished as needed. Expired items should be replaced promptly to ensure the kits are always ready for use.
4. **Training:** Staff members must be trained in basic first aid and CPR. This training should be updated regularly to ensure that all staff are prepared to handle emergencies.

For more detailed information, you can refer to the [Indiana Family and Social Services Administration's guidelines](#).
