Keeper: Installing KeeperFill

This document contains the step by step instructions on how to download and sign in to your Keeper Security Account using the KeeperFill Chrome Extension.

Before we get started, watch the short video below to see how KeeperFill works and how you will use it in your day-to-day work:

Step 1: Install The KeeperFill Extension

Click the following link to the Chrome Extension Store and click "Add to Chrome" to add KeeperFill to your web browser:https://www.keepersecurity.com/get_extension.html

In the Chrome Web Store Click "Add to Chrome"

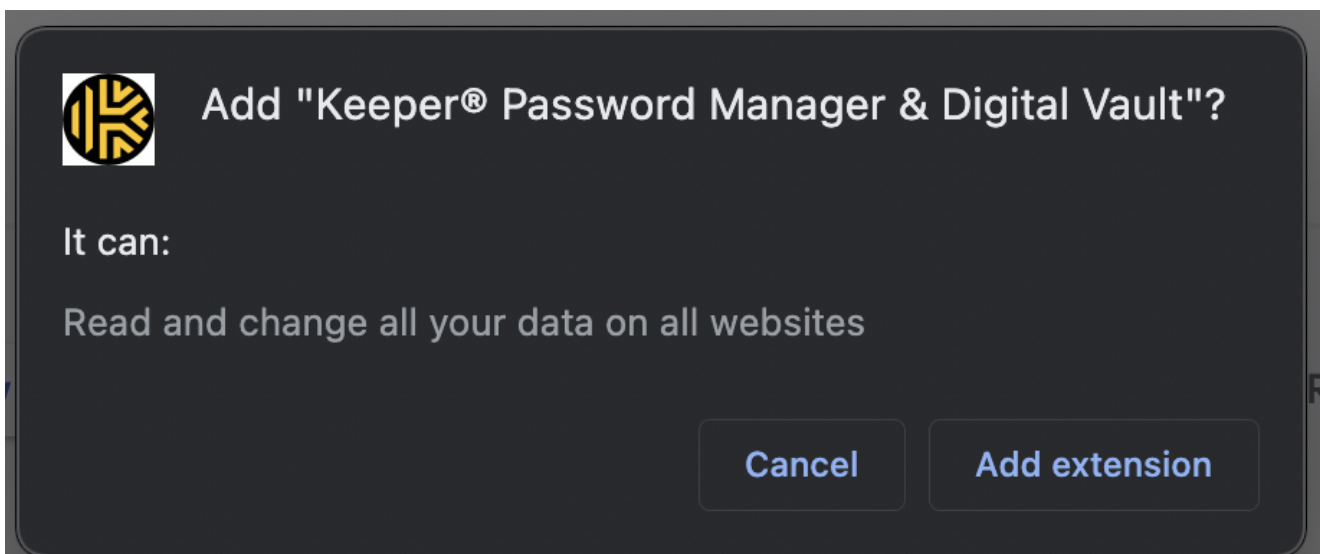

Keeper® Password Manager & Digital Vault

 keepersecurity.com  Featured

Add to Chrome

Click "Add extension"

Step 2: First Login to KeeperFill

After it's installed, click on the White Puzzle Piece on the top right corner of your Chrome Browser, this is where all your Chrome Extensions live.

- 1) Click the Thumbtack Icon for the KeeperFill extension. This permanently moves it to your browser toolbar so you'll always have 1-click access.
- 2) Click the KeeperFill icon in your toolbar.
- 3) Open the Enterprise SSO Login dropdown menu.
- 4) Select Enterprise Domain from the dropdown menu, and enter your Enterprise Domain: rightatschoolsso.

MAKE NOTE: You will be required to enter our SSO domain of "rightatschoolsso" each time your session expires and you are asked to log in.

- 5) Enter the code that Keeper sends to your mobile device and set your "Require 2FA" to Every 30 days.
- 6) Click Login.

Success!

You've successfully setup KeeperFill!

Do you need Keeper on your mobile phone?

With the Android and iOS mobile applications, Keeper can save you even more time by auto-logging you in to sites and applications on your mobile device so you never have to remember a password.

Keeper: Changing Passwords with KeeperFill

KeeperFill makes it easy to change your passwords. When a user visits a site's "Change Password" page, you will receive a prompt from Keeper asking if you would like help changing your password. By clicking **Yes**, Keeper will run a wizard that walks you through a few quick steps to change your password and simultaneously update the record in your vault. These steps will include a series of prompts detailing the following actions:

- Autofill your old/current password
- Automatically generate and autofill a new secure password
- Confirm the changes and save them to your vault

The video below demonstrates how KeeperFill can help you change your passwords.
