# Keeper: Setting up Keeper on your mobile device

This document contains the instructions on how to download and sign in to your Keeper Security Account on your Mobile Device.

Installing Keeper on your mobile device will ensure that you can log in to all of the sites you have saved in Keeper without typing in a username or password.

Step 1: Install the Keeper Password Manager App

On your Mobile Device, in your app store, please search for the Keeper Password Manager App.
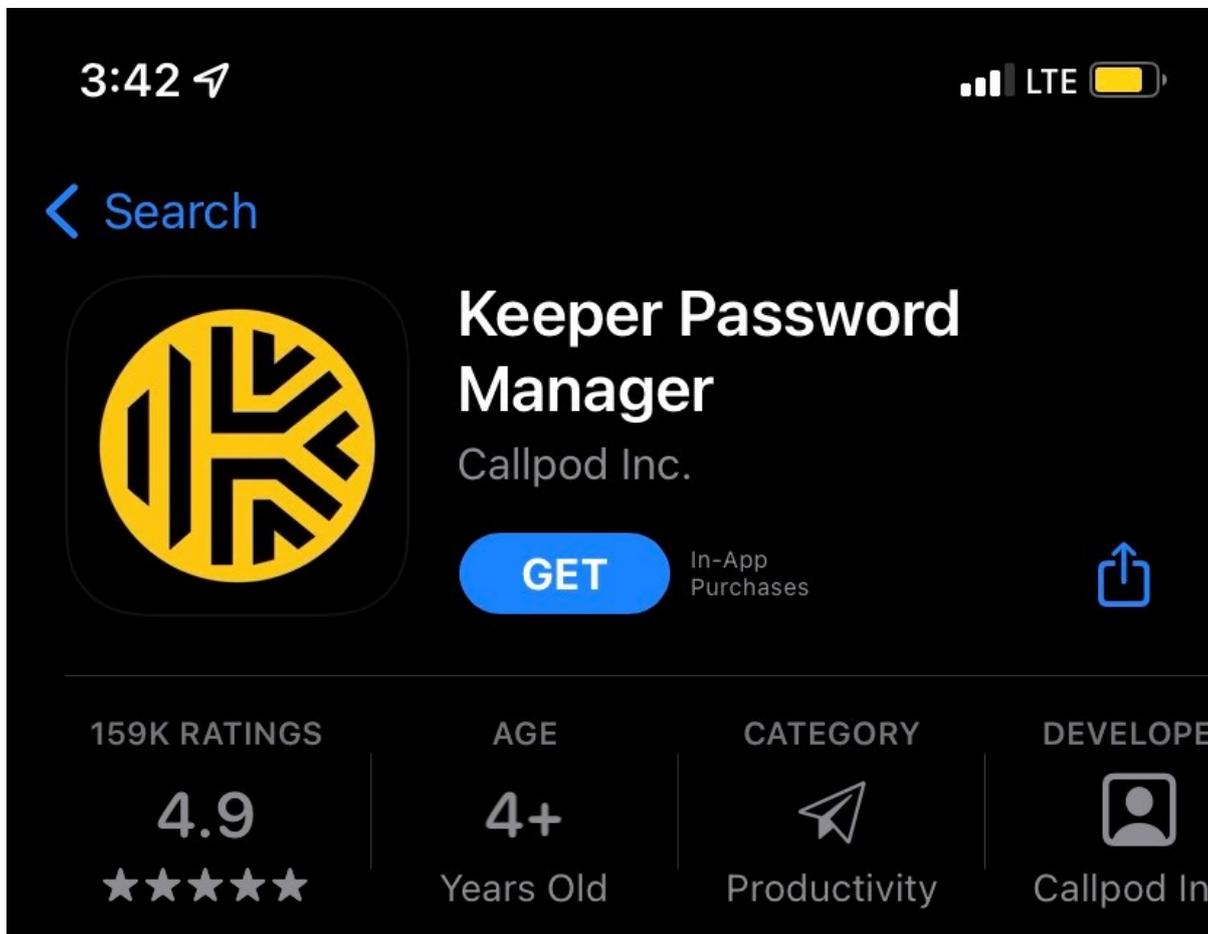

For easier access, you can scan the QR Code below to download the app on your mobile device.

Scan QR code to download

Step 2: Logging in to Keeper on your Mobile Device

1) Once you've downloaded and opened the app, click the login button.

2) You will be prompted to enable Push Notifications; click Enable Notifications.

3) If prompted, click allow notifications.

4) Similarly to the login process in Account Setup, click "Use Enterprise SSO Login", at the bottom of your screen.

5) Click Enterprise Domain and enter the Enterprise Domain at the top: **rightatschoolsso**.

> **MAKE NOTE:** You will be required to enter our SSO domain of "**rightatschoolsso**" each time your session expires and you are asked to log in.

6) Click Connect. If prompted with this notification "Keeper wants to use keepersecurity.com to sign in" click Continue.

7) On the Google Login page, click Next.

8) Make sure you enter your Right At School Gmail credentials, then click Next.

9) On the Keeper Two-Factor Authentication screen, enter the Verification Code that was sent to your mobile device.

10) Change your Two-Factor Code Duration to "Require 2FA every 30 days".

Please enter the code sent via text message.

Cancel
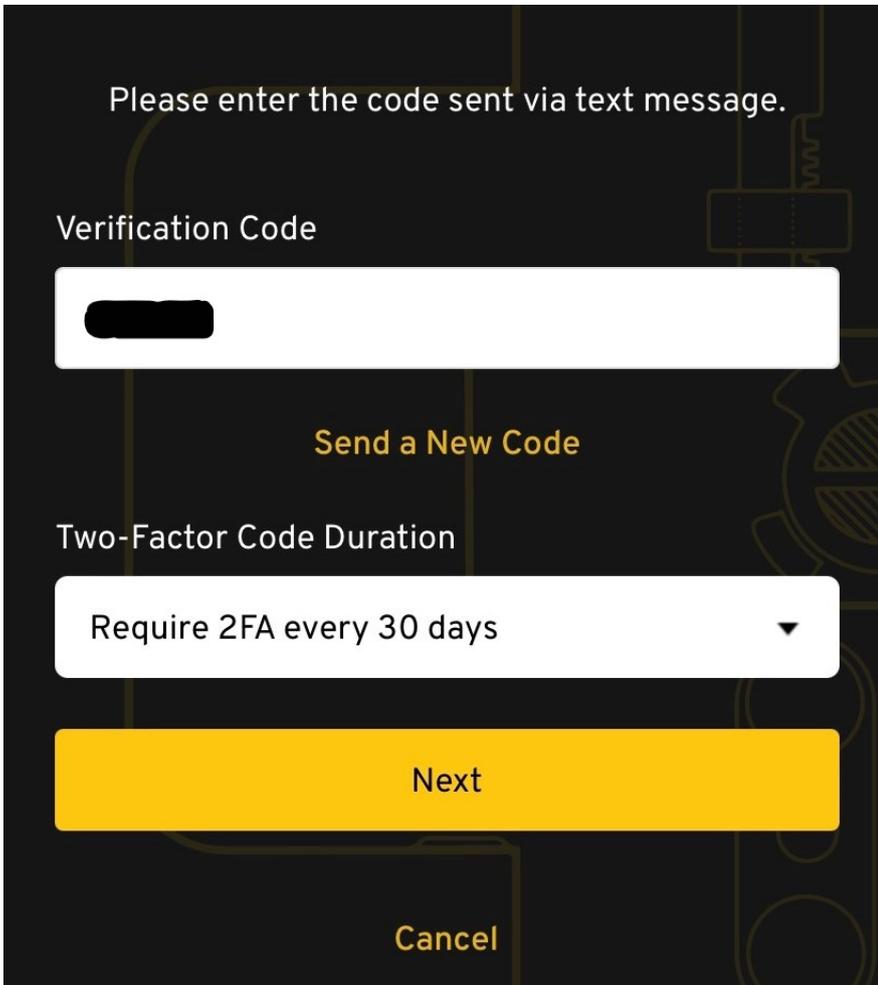

Before you proceed, open Keeper Security in your Google Chrome Browser and login. This step is important for the next step. For assistance, refer to Step 1 of Account Setup.

11) Click next, and you will then be prompted to Send Keeper Push. This Keeper Push will be sent to your Keeper Security Account that you've opened in your Google Chrome Browser.
12) Click the Green "Yes" button on your desktop, it should look like the screenshot below.

Success! You've now downloaded and successfully setup Keeper Security on your Mobile Device!

Step 3: How to Use Keeper for IOS/Android

Watch this 2 Minute Video below for details on how to use Keeper Security for IOS Devices.

Watch this 2 Minute Video below for details on how to use Keeper Security for Android Devices.
